SUMMARY

Results-driven Full-Stack Developer with hands-on experience building responsive, user-focused web applications. Skilled in React, Node.js, Tailwind CSS, and Supabase. Passionate about clean code, thoughtful UI/UX, and delivering real-world solutions that make an impact. Currently freelancing and actively seeking full-time opportunities.

EXPERIENCE

Freelance Developer

2026 — Present

Independent / Remote

- Designed and developed end-to-end web solutions for local businesses, from UX wireframes to deployed production sites.
- Built a car shop management system with real-time dashboard using Node.js and Supabase.
- Created a photography portfolio website with responsive design, smooth navigation, and immersive layout.

Front-End Developer Intern

April 2022 — August 2022

DP Chartam — Baguio City

- Assisted in building and maintaining front-end components for client web projects.
 - Collaborated with the development team to implement UI designs and ensure cross-browser compatibility.
-

PROJECTS

Portfolio for Photography

droidanphotography.com

HTML · CSS · JavaScript

Clean and responsive photography portfolio designed to showcase visual work with elegance, minimal design, and an immersive viewing experience.

Car Shop Management System

car-management-system-seven.vercel.app

Node.js · Supabase · JavaScript

Real-time dashboard for car shop operations — tracks key business data, prioritizes new clients, and improves overall efficiency and customer experience.

Personal Developer Portfolio

React · Tailwind CSS · Vite · Vercel

Fully custom portfolio website featuring animated UI, contact form with Resend email integration, and responsive design. Deployed on Vercel.
